ARJ SHIPPING SERVICES

Oil and Natural Gases are vital to a country’s economy, particularly in regions where indigenous resources are unable to meet internal demand for energy and mobility. Resultantly, safe, secured and on-time delivery of such resources has gained prominence over the period.

Our commitment towards all these aspects, along with a high degree of customer satisfaction, has led to our stupendous growth, making us one of the largest independent marine fuel suppliers in the world, commanding a major portion of the global bunker market represented in U.A.E. with a fleet of different sizes of Marine vessels and tankers.

At ARJ Shipping Services, we take pride in our quick services .With our expanded network, a full array of services and a dedicated team of experts to cater your needs; we have carved a niche for ourselves in this domain with the Activities are Sea Freight & Passengers Charters, Custom Broker, Sea & Air Cargo Services, Container Loading & Unloading Services, Cargo Packaging loading and unloading, ship chandelling and shipping services agents and being one of the long established and active, independent player in the shipping industry. We implore agency services on all UAE parts and practice all ships to attain the country Flag accompanied with the navigation license. We maintain the best-business practices to achieve our planned objectives through careful and meticulous implementation, trading of used or recovered oil in distillation. To ensure smooth deliveries, we work in close contact with our customers, physical suppliers and brokers.

To support the logistical activities involved, a growing operational team works side-by-side making the performance quite competitive in Custom broker, Sea and Air cargo services, container loading & unloading services, cargo packing loading and unloading ship candling and shipping services agent and bunkering in all U.A.E. With the flexibility, speed, clear leadership, untiring efforts and logistics back-end support that our customers need and expect, we are able to add value that is beyond simply moving physical products. Over this period, we have gained prominence by meeting shipping requirements of various companies in the region efficiently, securely and in a cost –effective manner. Our corporate philosophy stimulates us to provide a processional service to customers and nurture this long-lasting relationship on a solid foundation of mutual trust and integrity. ARJ Holding has been a household name in the Middle East since 1964. Headquartered in Dubai - UAE and covering the entire Middle East and gulf regions, we have created strategic offices in India, USA, Uzbekistan, Georgia, South Korea, Russia, Switzerland and Hong Kong. ARJ is growing from strength to strength, delivering consistent quality and setting new standards in excellence.

TANK STORAGE

SHARJAH OIL STORAGE FACILITY

The Storage Facility commenced it's operation for storage and trading in 2018 and has a storage capacity of 66,000 MT, out of which 32,000 MT capacity is assigned for crude oil, other products with which the Storage Facility operates are base oil, fuel oil, gas oil, diesel and gasoline.

REFINING

Comprises of distillation and processing of petroleum products to produce different Petrol Chemical products. We are fully equipped for the facilities needed for fully equipped for facilities needed for loading liquid hydrocarbon into a range of vessels, proper flame arrestors are installed to prevent any flash back with automatic shut off system. A complete understanding of the energy market requires appreciating the views of all-important players, their concerns, challenges faced and the solutions that are being considered. We work to ensure reliable, affordable and clean energy solutions for all of our customers. The company is headed and managed by a professional and an experienced engineer who is well versed with the changing trends & techniques of the energy sector. As a backbone of all our commitments, there is a core team, which is a combination of well-recognized specialists from various segments of renewable energy, carbon footprints, and environment.

Our distillation and processing plant Produce petro chemical products, Gas Oil, Fuel Oil, Kerosene and Other products by vacuum distillation Process. The Base Oil Stocks are Then Mixed And Compounded With Additives To Meet The Required Physical And Chemical Characteristics Of Motor Oil, Industrial Lubricants, Marine Engine Oils and Other metal working Oil.

We understand the market, the technology; the drivers and the challenges faced by the industry, & have thus established global partnerships to deliver a range of high services with performance that makes us partners of choice for our clients.

Since our inception in 2008, we have evolved, expanded & have continued to build good working relationship with our customers by operating assets at optimum performance level, thereby requiring relatively maintenance expenditures. We also have our own in-house team to train and develop the personnel to be best in the energy industry.

REFINING PROCESS UNIT DESCRIPTION

Abs International Energy L.L.C was established in 2008 with initially 350 MT/Day capacity of distillation plant which has been expanded to 600 MT/Day as on today. They are involved in virtually every facet of energy and fuel industry. ABS International Energy LLC is involved in distillation of processing of petroleum products to produce Marine Gas Oil, Fuel Oil, Kerosene and other products by vacuum distillation process.

STORAGE TANKS

The Storage yard consisting of steel storage tanks of varying sizes to cater to its inventory need for operations. All these tanks are mounted on strong foundation with civil concrete work. The tanks are mounted on the concrete floored platform and provided with ladders, level gauges and also supported by pumps for loading, unloading and transfer material. All the tanks, pumps and plant area are intricately connected by a pipeline network.

LUBRICANT PLANT

The base oil stocks are then mixed and compounded with additives to meet the required physical and chemical characteristics of Motor Engine Oil, Industrial Lubricants, Marine Engine Oils, Metal working fluids and greases. Refinery also has lubricants production line, with the production capacity of 10,000 MT per month, producing industrial lubricants, engine lubricants and transformer lubricants. E new brand of lubricants has been registered for MEA region.
